

# FILTERBANK MANAGER v1.0

## ABOUT

I was tired of always having to manually write down the settings on my Sherman Filterbank 2. The notes would just float around on my desk for a while, before finally going missing when I needed them the most...

This program will allow you to relatively quickly note down your preset and save it as an imagefile to keep, for example, in your project folder. For your convenience I included the presets that are featured in the Sherman Filterbank 2 manual...

I hope the program will suit your workflow as well as it suits mine...

## INSTRUCTIONS

- Install and start the program
- **The installer will check if .NET 4.0 Client is available and install it if necessary**
- Set up your virtual Filterbank and give your preset a name
- Save your settings as an sfb-file for later use or for sharing online
- Choose the layout you want
  - REALISTIC (Looks like a real Filterbank / not very printer friendly / slightly less readable)
  - SCHEMATIC (More symbolic representation / easily printable / very readable)
- Save your settings as an image and keep it in your project folder.

## THANKS!

Special thanks to **Sherman** and **Herman Gillis** for making the Sherman Filterbank 2 such an excellent piece of musicmaking machinery. The background for the interface comes from the Sherman Filterbank 2 manual. – [www.sherman.be](http://www.sherman.be)

Thanks to the genius known as **g200kg** for creating the little program called KnobMan I used for creating the knobs on the interface. – [www.g200kg.com](http://www.g200kg.com)

Thanks to **AZ** for making the switch I used as a base to create the switch in the Filterbank Manager GUI. – [bji.yukihotaru.com](http://bji.yukihotaru.com)
